Journal of Fluid Mechanics **Volume 325 25 October 1996**

S. C. Crow & G. G. Bergmeier Active sonic boom control *page* 1

Y.-C. Chen & J. H. Chung The linear stability of mixed convection in a vertical channel flow 29

D. I. Dratler & W. R. Schowalter Dynamic simulation of suspensions of non-Brownian hard spheres 53

R. Mei & C. J. Lawrence The flow field due to a body in impulsive motion 79

B. Gaffet Expanding gas clouds of ellipsoidal shape: new exact solutions 113

T. Allen, S. N. Brown & F. T. Smith On vortex/wave interactions. Part 2. Originating from axisymmetric flow with swirl 145

B. Ramaswamy, S. Chippada & S. W. Joo A full-scale numerical study of interfacial instabilities in thin-film flows 163

P. L.-F. Liu, M. H. Davis & S. Downing Wave-induced boundary layer flows above and in a permeable bed 195

M. D. Bryden & H. Brenner The effect of laminar chaos on reaction and dispersion in eccentric annular flow 219

A. Muschinski A similarity theory of locally homogeneous and isotropic turbulence generated by a Smagorinsky-type LES 239

S. E. Harris The growth of periodic waves in gas-fluidized beds 261

Y. S. Khazan & A. A. Nepomnyashchy Three-dimensional long-wave instability of unidirectional spatially periodic viscous flows 283

G. S. Bhat & R. Narasimha A volumetrically heated jet: large-eddy structure and entrainment characteristics 303

R. Smith Transport in lungs and branched estuaries 331

P. G. Chamberlain & D. Porter Approximations to wave trapping by topography 357

D. H. Peregrine & L. Thais The effect of entrained air in violent water wave impacts 377

C. M. Casciola & M. Landrini Nonlinear long waves generated by a moving pressure disturbance 399

Lui Yongming, Mu Mu & T. G. Shepherd Nonlinear stability of continuously stratified quasi-geostrophic flow 419

REVIEWS

Fluid Dynamics for Physicists, by T. E. Faber 440

Introduction to Circulating Atmospheres, by I. James 441
